

Altrincham College is located within a residential area and surrounded by farmland. The design for the new build expansion is sympathetic to the surrounding architecture and context. The new block (shown in the site plan) will be situated where the existing mathematics block currently resides. This mathematics block is beyond economic repair and is to be demolished to make way for the new block. The new block will provide space for an additional 300 pupils, utilising 30 new classrooms, which is shown on the layout plans.

In proximity to the current structures, the new block will be positioned six meters away from the gymnasium and will extend farther towards the playing field compared to the existing mathematics block. This strategic placement unifies the two smaller existing playgrounds, culminating in the creation of a more expansive courtyard playground at the heart of the academy.
