Integrated Assessment Framework

As described in the Scoping Report, the framework contains a series of objectives and assessment criteria. These are presented in the form of guide questions developed to reflect the social, economic and environmental issues that may affect (or be affected by) the Local Plan and the objectives contained within other plans and programmes. The assessment of the effects of proposed policies and sites is presented in a matrix format. To provide an overview of the outcomes a summary is also provided at the end of each table. This appendix tabulates the summaries together, one each for the policies and sites (Tables 2 and 3). As with the other assessment tables symbols and definitions for the IA Framework are set out in Table 1 below. The full assessment of each policy and site can be viewed in Appendix C for the Regulation 19 Draft Local Plan Policies and Appendix D for the Sites that are being allocated in the Regulation 19 Local Plan.
